Learning rate, inheriting or not

population mean of the gene, started at 0.2

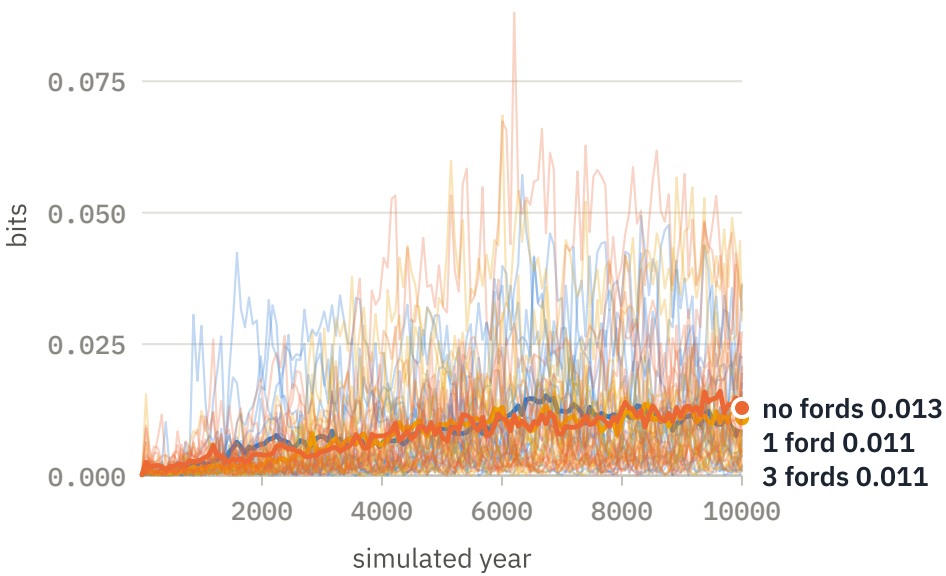

Signal entropy

bits; 2.0 means all four signals equally often

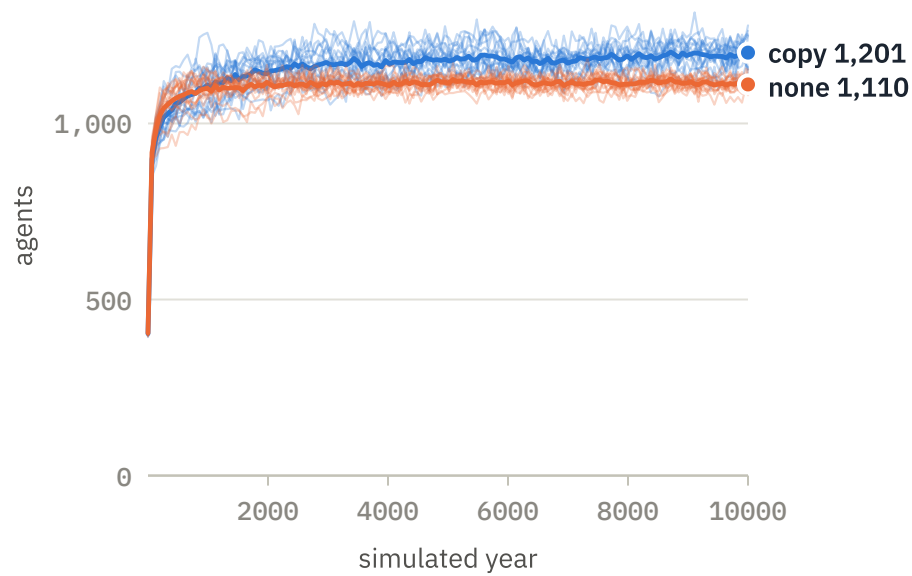

Do the banks signal differently?

Jensen-Shannon divergence, bits

Population, inheriting or not

agents alive at the year's end

Bold lines: the mean of sixteen seeds; faint lines: each seed. copy is the defaults; none starts every child with a blank Q-table; the river arms differ only in how many fords cross the river.
